

INSTALLATION INSTRUCTIONS GETTING STARTED

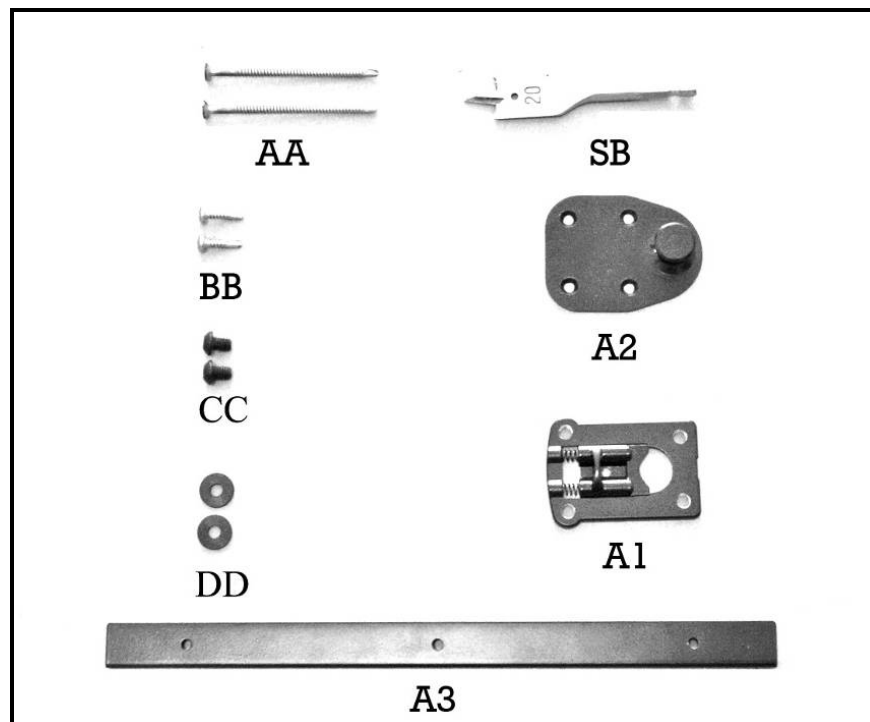

By JES Innovations, Inc.

Visit our website at <http://www.xtremegate.com>.

Things to Consider Before You Start!!!

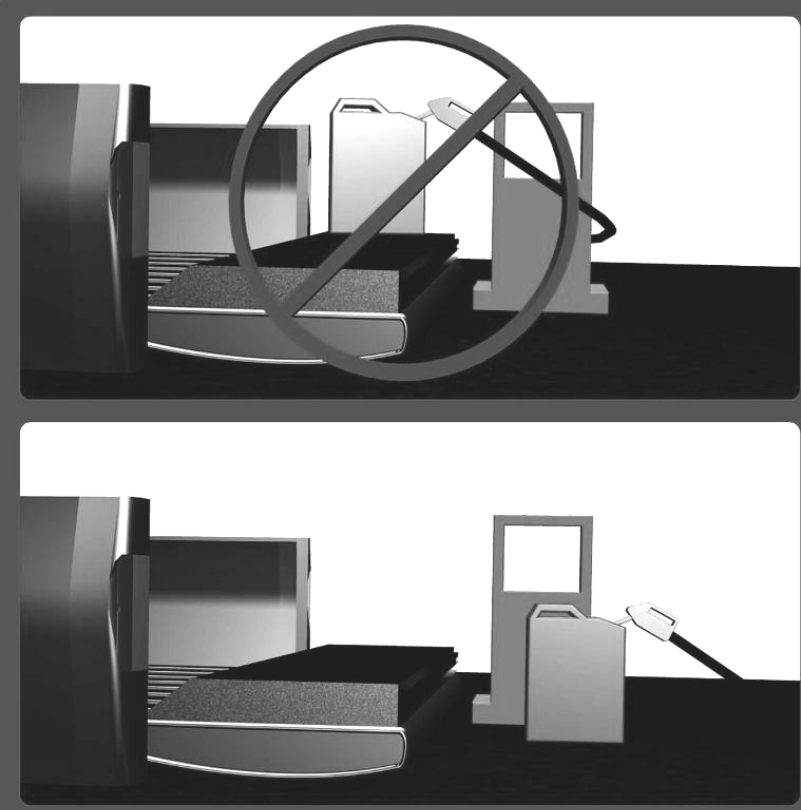

- Your X-Treme Gate's Installation Instructions are for unmodified bed and tailgate applications.
- You must remove any bed liner panels attached to your tailgate.
- If your bed has a tonneau cover you must consider the clearance issue with support brackets, sliding rails, and locking mechanisms. Your X-Treme Gate may be mounted forward/lower on the tailgate to compensate for this clearance; however you must compensate for the change in the side panel templates as well. The best way to do this is test for clearance with the tailgate closed before proceeding with the install.

Parts Description Key

DISCLAIMER

Buyer assumes all risk and liability whatsoever from the installation and use of JES Innovations products. The X-Treme Gate is sold as a truck bed accessory and should not be relied upon as protection for the occupants or vehicle in the event of a collision or roll over. Vehicles equipped with a supplemental restraints system (air bags) deployed by impact should not be modified by any aftermarket product without first consulting the vehicle manufacturer. JES Innovations, Inc. assumes no liability for injury, loss, incidental or consequential damages in the event of a collision or roll over. Neither JES Innovations Inc. nor its Distributors will be liable for any claims, actions, suit proceedings, costs, expenses, damages or liabilities arising out of the use of this product.

WARNING!

- * Not intended for passenger transport!
- * Do not ride on the tailgate while under way!
- * Do not exceed 200 lbs. on the tailgate while under way!
- * Load and secure heavy cargo to the front of the cargo bed!
- * Do not lean heavy objects across the top rail of the extender or against the panels when deployed!
- * Never "off road" on rough terrain with your tailgate in the open position!

FIRE WARNING!

- * Static Electricity may cause fire and explosion!
- * Remove gas can from cargo bed and place it on the ground before filling!
- * Touch vehicle body, gas pump, and gas can before pumping gas!
- * Keep pump nozzle in contact with gas can while you are filling it!
- * Only use approved gas containers!
